(54) Title: TRANSMISSION SYSTEM

(57) Abstract: The invention relates to a transmission system (10) comprising a transmitter (12) and a receiver (14). The transmitter (12) is arranged for transmitting a plurality of signals (13), e.g. radio and/or television signals. The plurality of signals (13) comprise mutually corresponding signals, e.g. analog and digital signals of the same channel or program. Alternatively, the mutually corresponding signals may comprise standard definition and high definition signals of the same channel or program. The receiver (14) is arranged for receiving at least part of said plurality of signals (13). The transmitter (12) is arranged for

transmitting information (15) identifying said mutually corresponding signals and the receiver (14) is arranged for receiving said information (15). The receiver (14) comprises a selector (16) for selecting on basis of said information (15) at least one (17) of the mutually corresponding signals. In this way, the receiver (14) can automatically select the most appropriate signal (17), e.g. for inclusion in a list of available channels/programs or for reproduction.

INTERNATIONAL SEARCH REPORT

National Application No

PCT/IB 02/05729

A. CLASSIFICATION OF SUBJECT MATTER

IPC 7 H04N7/08 H04N7/06 H04N7/025

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 H04N H04H

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

Further documents are listed in the continuation of box C.

Patent family members are listed in annex.

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *&* document member of the same patent family
